

# ROCKWELL AUTOMATION Remanufacturing Process

## RECEIPT AND VERIFICATION

Your unit's catalog number, series and revision data is verified against its return authorization for warranty and product configuration.

## REVISIONS AND ENHANCEMENTS

Your unit is disassembled, cleaned and enhanced with the latest proprietary firmware and hardware updates from the original equipment manufacturer (OEM).

## COMPONENT VERIFICATION/REPLACEMENT

Individual components and subassemblies are inspected and tested to original design parameters. Inoperative components are replaced, and proactive measures are taken to replace marginal and aged components.

## FUNCTIONAL AND LOAD TESTING

Trained technicians certify the full functionality of your unit using proprietary OEM test equipment to confirm that all performance and output load specifications are met.

## ENVIRONMENTAL SIMULATION

Cases such as intermittent inoperability may require more extreme testing methods. Your unit can undergo controlled environmental applications such as high temperature, shock and vibration or humidity testing.

## FINAL QUALITY INSPECTION

A tracking record verifies all necessary operations have been completed. Quality Control Inspectors cosmetically clean and visually inspect the unit, and label it with the updated revision.

## SECURE SHIPPING

Accessories such as keys, batteries and manuals are added and your unit is shipped back to you in custom-engineered, anti-static bags and containers.

### OEM Quality

As the manufacturer of Allen-Bradley® products, we are the only authorized service supplier of Rockwell Automation OEM-specified components.

## 12

### Month Warranty

Every remanufactured part receives a minimum 12-month\* comprehensive warranty on the entire unit, not just the replaced components.

\*Up to 24-month warranty, depending on the region

## \$\$\$

### Savings

Rockwell Automation tracks your new product warranties and can help save you thousands of dollars in repair costs, depending on your installed base.

## 500

### Products/day

Our remanufacturing facilities see approximately 500 products every day and our technicians have access to over \$50 million in available parts inventory.
